Gurney's FINE EVERBLOOMING ROSES

ALL 2-YEAR OLD FIELD GROWN PLANTS
BLOOM FROM JUNE 'TIL FROST

For years we have had our roses grown for us under contract by one of America's Foremost Rose Growers. A whole field is grown especially for us and every rose in that plot is our property. Naturally it is impossible for them to all grade out as 2 year No. 1 plants. This means the slightly smaller ones (not culls) but the No. 2 grade are literally surplus because we do not list them in our big catalog.

There is only one answer to the problem—offer this grade at a greatly reduced price even though they are healthy, disease-free plants that should develop into real beauties in a short time. The quality is just as high as any other grade. We would get double what we are charging if they were only a little larger. You won't receive a single cull or damaged rose when you take advantage of this offer.

By allowing us to ship to you by color and not name you get the same roses at a great reduction in price and it will help us get rid of our surplus.

Gurney's Combination Spray Saves Time, Work, Money

So Easy to Use

In the past, the trouble with spraying fruit trees has been that you had to buy a lot of different chemicals, get a spray chart and then try to figure out what to mix for each different fruit and different time.

Now with Gurney's COMBINATION FRUIT SPRAY, you buy just one package and just add water as directed.

How Much to Order

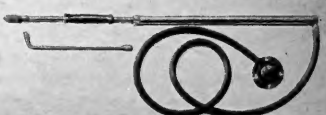

You just use one pound of spray with 12 gallons of water—enough to spray 4 average-size fruit trees 5 times during the season. Figure about half that amount for young fruit trees not yet bearing.

Gurney's Guarantee

Just follow instructions and if Gurney's Combination Fruit Spray does not satisfy you 100%, we will refund the entire purchase price—you are the judge and jury.

sensational "Miracle tree":

GURNEY'S GENUINE HYBRID ELM

Absolutely No Other Shade
Tree Can Match These Truly
Amazing Features:

1. EXTREMELY FAST GROWTH

Imagine a growth of from 8 to 14 ft. in just one short growing season. This isn't uncommon at all. You really get shade in a hurry with Gurney's Hybrid Elm.

2. DISEASE RESISTANT

Gurney's Hybrid Elms have never been known to be bothered by the dreaded Dutch Elm Disease. This is important to all planters everywhere.

3. HARDWOOD—LONG LIFE

Many believe, because the Hybrid Elm grows so fast, it is a soft wood tree. This is not true. Not only are Gurney's Hybrid Elms a hardwood tree but they are long-lived too.

4. HANDSOME SHAPE

One of the outstanding features of Gurney's amazing Hybrid Elm is its beautiful shape. It grows as symmetrical as any deciduous shade tree we have ever seen.

5. FILTERED SHADE

This is important if you expect to raise a nice lawn beneath your shade tree. The Hybrid Elm has a large leaf yet it is not so dense that the sun can't get through to the grass.

You may find it hard to believe
that the Hybrid Elm actually
GROWS 8 to 14 FT. per YEAR!

THE TREE THAT HAS DELIGHTED THOUSANDS

It is almost impossible to say enough good things about this wonderful Hybrid Elm. Our customers that are growing it, feel this way too. We don't know of any other shade tree that has as many good qualities and as few faults—if any—as our Hybrid Elm. Because our trees are all budded or grafted they are all identical in type of foliage, bark color, texture, etc. In the years we have sold these trees they have been the perfect answer to our customers' prayers for a rapid growing, hardy, beautiful shade tree.

HYBRID ELMS SHIPPED RED-PRUNED

We do this to allow the tree to replace the many small feeder roots lost in the digging process, and also to reduce the chance of your losing it after planting. For successful results you must equalize the roots lost at digging time by removing almost an equal amount of the top growth. This is a must for a successful start.

HYBRID ELM. PRICES: No. A4239S—All Postpaid. 5 to 6 FT. 3.98 EACH; 2 for 6.98.

SEE FOR YOURSELF HOW IT GROWS

This picture shows Dr. D. B. Reaney of Yankton standing by his Gurney Hybrid Elm. It was 5 ft. tall when planted in June of 1957. The picture was taken in September of 1958. The Doctor stands about 6 ft. tall.

FAMOUS HANSEN IMPROVED BUSH CHERRY

Hardy—Grows Anywhere

How would you like a plant that would produce huge clusters of nearly black cherries. What's more it makes a beautiful shrub. If this is what you like, you will like the famous Hansen Improved Bush Cherry. Actually grows only about three to five feet in height so you can see it won't take up much room.

The little bushes start bearing fruit the second year after planting and they will live and bear for years. If apples can be grown in your area you can raise the famous Hansen Bush Cherry. Be sure to prune them severely as soon as you have them planted.

Did You Ever Think About This?

This is not a claim but a fact. We offer to save you the dealer's commission. We think no one is justified in claiming to have the best corn on the market so we don't claim it. We do know our corn is as good and will hold its own in competition with any other brand. Year in and year out it will be on top as often as any other single variety. Because we eliminate commissions, Gurney's Golden Hybrids sell for 2.50 to 3.00 per bushel less. This is a solid fact—not just a claim.

WHY PAY MORE?

You can pay more for seed corn than we charge for Gurney's Golden Hybrids, but if you do, the extra money won't get you any better seed corn. All it will do is pay the dealer's commission. We don't have any dealers so there is no commission to pay. But the corn is first class. Try it and see for yourself as thousands of others have.
